

Carton Clamps for Forklifts

Amongst the more handy additional parts designed for the lift truck is the Carton Clamp. It is designed for handling multiple items not secured on a pallet such as furniture, appliances, frozen cartons or canned goods. Large rubber-faced pads are used to squeeze both sides of the load really carefully. The load is then gently picked up and transferred to either the trailer or the warehouse. Carton Clamps were particularly designed to be used in the beverage, appliance, warehousing and electronics companies. Industries that make use of these clamps actually save plenty of money because they don't need to obtain, maintain, store or ship pallets. Carton Clamps allow for pallet free handling, really saving lots of warehouse space.

Typical features on all Carton Clamps, side-shifting allows for a much more precise alignment to be achieved through the placement of the load. Turning aluminum pads and a slim arm design allows for close piling of the load to be maintained. The close piling gets rid of useless spaces amid rows of stock plus more space is acquired in view of the fact that all the costly pallets are likewise eliminated.
