

## Concrete Hopper

The self-dumping hopper attachment could automatically activate to both dump and release when the bumper release touches the side of a dumpster. When unloading is completed, the hopper could go back to original upright and locked position. This particular piece of machinery is likewise available along with a cable which enables operation from the seat of the lift truck to be able to have the option of manually unloading the hopper. There is a locking chain provided to lock the hopper to the tine truck. This product is constructed with reliable and consistent robotic welds for utmost strength. The forklift dumping hopper even has a blue powder coat finish in order to maintain durability.
